

Western blot analysis showing the expression of p34 and p32 in two lanes, A and B. The molecular weight markers are indicated on the left: 94 kDa, 67, 43, 30, and 20. Lane A shows a strong band at approximately 34 kDa and a band at approximately 32 kDa. Lane B shows a strong band at approximately 34 kDa and a band at approximately 32 kDa.
